

# Narayan Paul

+91-8513826233 — sonaipaul20@gmail.com — github.com/narayan123git — linkedin.com/in/narayan-paul — Portfolio

## Education

**National Institute of Technology, Durgapur**  
B.Tech in Computer Science and Engineering

**2023 – 2027**  
**CGPA: 9.42**

## Projects

### VeloRide — Full-Stack Ride Booking Platform

GitHub — Live

- Built a scalable MERN-based ride-booking platform with JWT authentication and role-based access control.
- Designed RESTful APIs to manage the complete ride lifecycle including request, assignment, tracking, and completion.
- Implemented real-time ride status updates using Socket.IO, significantly improving application responsiveness.
- Structured backend using MVC architecture and optimized database queries using MongoDB indexing.

### Anemia Type Detection from Palm Videos — Deep Learning

Ongoing

- Developing a deep learning-based system to predict the type of anemia from palm (hand) videos.
- Collaborating with a fellow student and a college professor on problem formulation and model design.
- Preprocessed video data by extracting key frames and performing frame-wise analysis.
- Generated correlation graphs across video frames to identify patterns relevant to anemia indicators.
- Working on model training and evaluation for accurate multi-class anemia classification.

### Weather Forecast Web Application

GitHub — Live

- Built a responsive frontend application to display real-time weather data using REST APIs.
- Designed clean and mobile-friendly UI components using modern CSS practices.

## Training & Programs

### Amazon ML Summer School 2025

Selected Candidate

- Selected among top students nationwide for Amazon's invite-only machine learning program.
- Gained hands-on experience with supervised and unsupervised learning, CNNs, Transformers, and NLP.
- Worked on real-world datasets focusing on model training, evaluation, and optimization techniques.

### Emerging Technologies Internship (AI & Cloud)

4 Weeks

Edunet Foundation (in collaboration with AICTE and IBM)

Certificate

- Gained hands-on exposure to IBM Cloud Platform including cloud services, deployment workflows, and infrastructure concepts.
- Explored machine learning pipelines, AI model fundamentals, cloud-based AI use cases, and emerging technology trends.
- Worked on guided labs and practical exercises integrating AI solutions with scalable cloud infrastructure.

## Technical Skills

### Languages

C++, Python, JavaScript

### Frameworks

React, Next.js, Node.js, Express.js

### Machine Learning

TensorFlow, Keras, CNNs, Transformers, OpenCV

### Databases

MongoDB, MySQL

### Core CS

Data Structures, Operating Systems, DBMS, Computer Networks

### Tools

Git, GitHub, VS Code, Google Colab

## Achievements & Certifications

- Smart India Hackathon (SIH) 2025 — Semifinalist; advanced through multiple competitive evaluation rounds.
- JEE Mains 2023 — Secured 98.06 percentile among 10+ lakh candidates nationwide.
- WBJEE 2023 — Ranked 2356 in a highly competitive state-level engineering examination.
- Solved 250+ DSA problems across arrays, graphs, DP, and trees on Codolio.
- Participated in Flipkart Grid 7.0, gaining exposure to industry-scale problem statements.
- IBM SkillsBuild — Certified in Artificial Intelligence and Cloud Computing fundamentals.

## Extra-Curricular Activities

- Chess enthusiast with strong analytical and strategic thinking abilities, interested in drawing and visual storytelling as creative pursuits.
